PN 0295025

The SprayTECH EP2205 represents the next step in providing innovative, reliable products that meet the demands of professional contractors. The state-of-the-art DCX™ motor allows us to put big performance into a small package. With .55 gpm flow, and a maximum pressure of 3000 psi, the EP2205 will support a .023 tip, and allow you to spray a wide range of residential and commercial coatings. Maximize portability, performance, and profits with the new EP2205.

KEY FEATURES AND BENEFITS

- **Cool running 1.1 hp DC motor. Designed specifically for airless applications, provides greater life and lower maintenance costs on electronic components**
- **Triple lip seal design offers 50% greater packing life than competitive models, resulting in reduced repair costs**
- **Modular-designed pressure control holds a tight deadband, is service friendly, freeze resistant and proven reliable**
- **Less cycles than competitive units means less wear and lower maintenance costs**
- **Tungsten Carbide reversible inlet and outlet seats minimize service costs**
- **Full-size fluid filter offers greater filtration, longer tip life, less plugging, and lower maintenance than smaller-sized competitive filters**
